

LM Tag *Slim*

Light and Motion Sensor

LM Tag *Slim*

The NEW LM Tag™ *Slim* is about half the height of the traditional LM Tag™, providing a more low profile loss prevention solution. The LM Tag™ *Slim* uses the combination of a light sensor and motion detector to notify when the product is both in motion and concealed. It alarms at the point of theft, making it the only device on the market that has the ability to alert you before product walks out the door.

The LM Tag™ *Slim*'s adaptability and size are key to its design, making it appropriate for a wide variety of products and packaging types.

Specifications

- Just 1.6" sq x 0.35" deep
- Small size doesn't detract from product branding and adhesive back holds firmly to product without damaging packaging
- For enhanced security, the LM Tag™ *Slim* can be combined with existing anti-theft devices such as anti-sweep merchandisers or security hooks. Suitable for a large variety of boxed, blister-packed, and pegged items
- The LM Tag™ *Slim* is designed to be applied anywhere on the product, allowing you to best merchandise products and maximize retail space
- With the LM Tag™ *Slim* items are not locked up or stored behind a desk, allowing customers to interact with the product and eliminating the need for additional staff assistance.

Most feedback we received looked for us making a slimmer LM Tag™.
